It also has three pools to store irrigation water, ensuring a reserve of about 450,000 m<sup>3</sup> of water. Inside the property there is also a well to support the house or for

irrigation with regulatory permits, although its use is not frequent since the water supply of the house and even swimming pools is carried out from its own spring, the water arriving to the house by gravity, not being necessary its impulsion by electricity.

It is ideal for growing vineyards or olive groves, organic gardens due to the amount of water it has at all times of the year (free at birth and stored on the same farm) or horse farming.
